

BOSCH
Invented for life

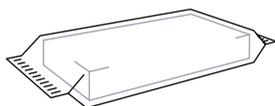

Our highlights at interpack 2017

Messe Düsseldorf/C.Tillmann

Discover our exciting innovations

Bars, biscuits or powders: with Bosch you can combine optimum productivity with careful product handling and maximum flexibility. Visit us at the Bosch stand in Hall 6 to find out more about our latest technologies.

Raise the Bar!

We've set the bar high. Thanks to the latest linear motor technology, our **bar system** is now

even more efficient and flexible than ever before. Up to 1,500 bars can now be packed per minute, from feed-in to first packaging right through to box packing.

Taking care of Biscuits!

The **Two-in-One biscuit packaging system** caused a sensation at interpack 2014 with its packaging

style flexibility and its very short conversion times. Many customers worldwide already placed their faith in the advantages of this system. At interpack 2017, we are going a step further, showing you how we have been able to improve on the most flexible and fastest biscuit packaging system in the world. Round, square, filled, coated or very fragile biscuits – our system guarantees maximum productivity and quality from oven to packet that meets the highest demands.

Powder Packaging Revolutionized!

Experience the debut of the first freely adjustable flat pouch machine **Sigpack VPF**.

Produce up to 1,800 flat pouches per minute. Or pack different powder products at the same time. Do you need different flat pouch sizes? No problem. The modular composition of the Sigpack VPF offers maximum flexibility and, therefore, investment security and cost efficiency.

Simply connected!

Go one step further and increase your overall equipment effectiveness with our new **Industry 4.0 solutions**.

We look forward to seeing you at the Bosch stand A30-C58 in Hall 6
