

Turning and Aligning of Products

Advantage: Turning of products with very little contact

Cross Distribution in Flow

Advantage: Handling of high row capacity due to distribution in flow
Contact free pre-alignment of products

Benefits

- **Gentle** product handling
- Easy and **quick cleaning** due to avoidance of guides
- **Hygienic** due to smooth surfaces and avoidance of edges and nooks
- **Precise** handling of small products due to minimal belt transitions
- **Easy operation** and maintenance due to simple, functional design
- A sturdy construction assures **high availability** and **long service life** under tough working conditions
- **Flexible** execution in mild steel painted and stainless steel
- Easy adaptation to particular **customer requirements** thanks to a simple, modular design
- Extremely **multifunctional** (many other functions possible)

Angle Head Conveyors
