

BOSCH

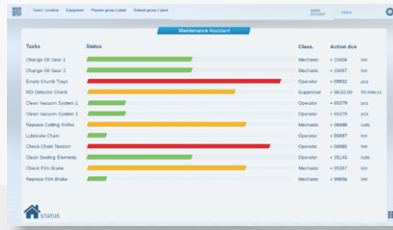

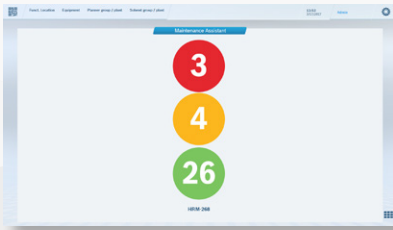

Invented for life

Easy maintenance organization with the Maintenance Assistant

Productivity and efficiency on a new level

Know your maintenance schedule

Maintenance Assistant

The Maintenance Assistant¹ is a visualization app for operators, maintenance, and service personnel directly connected in real-time, to the machine and to display data. The Maintenance Assistant indicates which maintenance or cleaning tasks need to be performed and shows personnel how to do so through a direct link to the Operations Assistant.

Application and Key Benefits

Prevent unscheduled downtime and improve efficiency through scheduled maintenance of parts that require cleaning, adjusting or changing. Individual adaptation and display of upcoming maintenance tasks minimizes unplanned maintenance and reduces the need for stand-by maintenance personnel.

Customer Value

- ▶ Real-time status overview
- ▶ Quick priority overview
- ▶ Schedule of maintenance work
- ▶ Assistance directly on the machine
- ▶ Reduces stand-by maintenance personnel

Combine with

- ▶ Maintenance Support System²
- ▶ Operations Assistant²
- ▶ Preventive Maintenance kits
- ▶ Modernization
- ▶ Group Training

1 Software: needs hardware for usage
2 Shopfloor application ("App")
