

# Transparent shopfloor management in real-time

## Shopfloor Dashboard

The Shopfloor Dashboard<sup>1</sup> is an IT system that provides operating personnel with a simple management tool for transparent shopfloor overviews in real-time. Using a PC or touch monitor, users can configure individual dashboards by drag and drop with metrics (KPIs), information from connected machines or lines, media files, office applications, and internet applications. Shopfloor monitoring, meetings, and shift handovers can therefore be paperless and more efficient.

## Application and Key Benefits

The Shopfloor Dashboard provides personnel with a customized, holistic overview of the production – anywhere and anytime, whether on the shopfloor itself or in the office. The dashboard shows different parameters of production or line at a glance and enables preventative actions to avoid downtime.

## Customer Value

- ▶ Holistic shopfloor visibility for preventative actions
- ▶ Detection of trends before downtime occurs
- ▶ Network linked, so no redundant data, immediate action, and fewer errors
- ▶ Efficient, time-saving, and paperless meetings in manufacturing

## Combine with

- ▶ Maintenance Assistant<sup>2</sup>
- ▶ Operations Assistant<sup>2</sup>
- ▶ Condition and Energy Monitoring<sup>2</sup>
- ▶ Line Dashboard<sup>2</sup>
- ▶ Training

1 Software: needs hardware for usage
